ABOUT ME

My background is in applied linguistics working in education and I enjoy using educational technology to facilitate learning. It turns out that I am passionate in coding and I am excited to work in an awesome company where I can contribute in a meaningful way and work with other creatives to make people's life easier, as well as growing into a full-stack developer.

SKILLS AND ABILITIES

- Programming Languages: JavaScript, HTML5, CSS3, TypeScript, PHP, SQL (MySQL)
- Libraries and Frameworks: jQuery, React.js, Node.js, Boostrap, Express, Sequelize ORM
- Tools and Platforms: Git, Heroku, Cloudinary, Zeplin
- Design: Adobe XD

WEB PROJECTS

- Restaurant booking website

A website for clients to book their tables on the date and time they want. Admin can edit menu and manage customers' booking. Utilise React hook for front-end and Node.js as server-side where REST API is implemented by Express. Deployed to Heroku.

- React to-do list

A simple React web application for creating a list of to-do tasks. Users can mark the tasks as done and they can also delete them. Tasks can be saved into and retrieved from local storage.

- PHP message board

This is a website where users can leave their message when they login. They can also edit and delete their own message. Admin has more access such as managing all users' posts as well as their permission. Database is MySQL.

- Twitch project

Using Twitch API, this website displays 20 livestream profile pictures of the top 5 games on Twitch.

WORK EXPERIENCE

Web developer 2021.06 - present
